

AUTOMATED CURBSIDE COLLECTION COMING IN JUNE

North Cowichan will be moving to automated collection for garbage and organics (yard and food waste) beginning in June.

We're getting started to make sure you have the information you need for this important change.

What is automated collection?

With automated collection, mechanical arms will lift bins and empty them into the collection truck. This means all residents will need uniform carts that work with the arms – these are provided by North Cowichan and are expected to be delivered in April/May 2025.

About the carts (coming in April/May)

You will get one garbage and one organics cart. You will receive an 80 litre cart size for both, unless you requested a larger size last year.

Recycling service will remain as is for now, and will be considered for automated collection in a future year.
